The first of these is the fact that the
 number of people who are employed in the
 service of the government is increasing
 rapidly. This is due to the fact that
 the government is expanding its activities
 in many fields, and is therefore
 requiring more personnel to carry out
 its functions. This is particularly true
 in the case of the armed forces, which
 are being expanded in size and
 equipped with more modern weapons.
 The second factor is the fact that the
 government is spending more money on
 its operations. This is due to the fact
 that the government is facing a number
 of new challenges, and is therefore
 required to spend more money on
 its operations. This is particularly true
 in the case of the armed forces, which
 are being expanded in size and
 equipped with more modern weapons.
 The third factor is the fact that the
 government is becoming more centralized.
